

## The first International Conference on ICT Application Research

### Overview

The first International Conference on ICT Application Research (IAR 2023) is the first international conference which International ICT Application Research Society (IIARS) holds.

One of the most typical characteristics of IIARS is the width of the research area. Our research area is not only ICT research, but all of research which is used ICT. Therefore, the area of the research is included all of natural science and social science related on ICT application.

IAR 2023 will be held as a hybrid conference. The general committee of IAR 2023 is aware of the current developments regarding the COVID-19 pandemic and we understand that some attendees cannot be determined to go Fukui. Therefore, we are planning all attendees, including authors, will be able to choose the option to do remote presentation and/or listening.
