IIARS
International ICT Application Research Society

IAR 2023

The first International Conference on ICT Application Research

Overview

The first International Conference on ICT Application Research (IAR 2023) is the first international conference which International ICT Application Research Society (IIARS) holds.

One notable feature of IIARS is the wide range of research areas covered. Our researchers study not only ICT itself, but all fields of study that use ICT, ranging from science and engineering to the social sciences.

IAR 2023 will be held as a hybrid conference. The General Committee of IAR 2023 is aware that there still are some travel restrictions due to the COVID-19 pandemic and we understand that some attendees may not be able to travel to Fukui. We are therefore offering the conference attendees the option of remote presentation and/or participation.
