

IAR 2026

The 5th International Conference on ICT Application Research
August 29 - September 1, 2026 Kochi, Japan

Overview

The 5th International Conference on ICT Application Research (IAR 2026) is the fifth international conference which International ICT Application Research Society (IIARS) holds.

One notable feature of IIARS is the wide range of research areas covered. Our researchers study not only ICT itself, but all fields of study that use ICT, ranging from science and engineering to the socialsciences.

IAR 2026 will be held as a hybrid conference. The General Committee of IAR 2026 understand that some attendees may not be able to travel to Kochi due to various reason. We are therefore offering the conference attendees the option of remote presentation and/or participation.
